EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Watkins on 6/10/05.

2. Claims 1, 5-11, and 13-16, as amended below, are allowed.
3. Please amend the application as follows:

In the Claims:

Claim 1 (currently amended): A programming station for generating an automation application program, ~~said automation application~~ to be executed in automation equipment and ~~comprising an automation application program~~ written in at least one graphic automation language, said programming station comprising:

an internal memory for storing a plurality of grammar files written in text format and compliant with eXtensible Markup Language (XML) syntax,

each said grammar file comprising a description grammar describing a syntax of a respective graphic automation language,

said internal memory for storing a plurality of application description files, each said application description files being expressed in an XML language and describing part of said automation application program, and

said programming station is for using at least one of said grammar files to generate at least one of said application description files describing part of said automation application program,

wherein said automation application program is generated by said programming station using at least one of the application description files, and

wherein said application description files comprise an automation application program description file, an application input-output description file and an application data description file.

In claim 7, line 2, delete "claim 2" and insert --claim 1--.

In claim 8, line 2, delete "claim 2" and insert --claim 1--.

Claim 11 (currently amended): An automation equipment for executing an automation program, comprising memory means for storing a plurality of automation eXtensible Markup Language (XML) ~~XML~~-application description files expressed in XML language, each said XML application description file describing at least part of an automation program and written in at least one graphic automation language compliant with the XML language, the automation equipment also comprising translating means for converting each XML application description file into a binary language that can be executed by the automation equipment; and

a plurality of grammar files written in text format and compliant with XML syntax, each said grammar file comprising a description grammar describing a syntax of a respective graphic automation language, and at least one of the said grammar files is for generating at least one of said application description files;

wherein said application description files comprise an automation program description file describing said automation application program, an application input-output description file for describing inputs-outputs manages by said automation application program, and an application data description file for describing data used by said automation application program.

4. The following is an examiner's statement of reasons for allowance. The prior art of record does not teach or suggest a programming station for generating an automation application program comprising grammar files describing a syntax of a graphic automation language, wherein said grammar files are used to generate at least one of a plurality of application description files, said application description files comprising an automation application program description file, an application input-output description file and an application data description file. Therefore, the presently claimed invention teaches an improved system for generating an automation application program.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aaron C. Perez-Daple whose telephone number is (571) 272-3974. The examiner can normally be reached on 9am-5pm.

Art Unit: 2154

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee can be reached on (571) 272-3964. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
